

Anabac[®] natural

Autoclave deodorant

NEW

Fragrance 100% natural origin

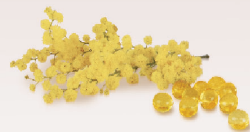

During and after the process, **Anabac[®] Natural** refreshes and perfumes the air in the room where the autoclave is located. **Anabac[®] Natural** is available in 3 fragrances: Coconut, Vanilla et Mimosa.

Coconut

Vanilla

Mimosa

interscience

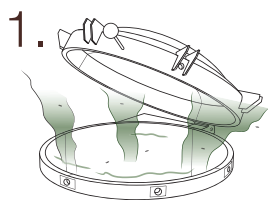

Based on natural extracts, **Anabac Natural®** efficiently eliminates the odours released by autoclaves and brings a pleasant fragrance to your laboratory.

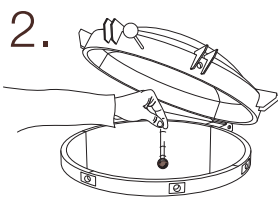

Biodegradable, this new range is more respectful towards lab technicians and the environment.

Anabac Natural® is certified ECOCERT according to the Cosmos-standard.

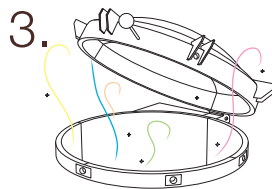

Anabac® Natural is compatible with all sterilization and decontamination autoclaves and does not affect the autoclaving process.

During sample sterilization, bad smell can emerge from the autoclave.

To handle this, place 1 capsule - or 2 if the smell is very strong - in the water at the bottom of the autoclave (for water-bottom autoclave) or in a beaker of water (for steam autoclave).

After a sterilization cycle, the capsule melts, allowing the perfume to be released.
